

ScentDirect™

DIRECT DIFFUSION SYSTEM

Global Technology Integrators

Overview:

The ScentDirect™ features precise advanced diffusion technology that converts liquid fragrance into a fine, invisible mist and releases it directly into the environment. The ScentDirect™ is designed for performance by maximizing the efficiency of scent delivery to cover a medium sized area. The system uses fragrance oil cartridges that are easily replaceable.

Product Features:

- Advanced atomization technology creates particles 1/50th the size of aerosol droplet and 1/125,000th the weight
- Patent-pending fragrance optimization system
- QuietDrive™ noise damping technology
- Adjustable scent intensity settings
- Twenty-four hour clock with programmable weekly events
- Scheduling set-up easily duplicated with SD-card feature
- 180° rotational mount
- Simple and clean replacement of fragrance cartridge
- Mountable on walls or track lighting
- Low maintenance with few moving parts
- Low voltage and low power consumption
- Available in black or white

SDD4004 - Technical Specifications

System Dimensions 10" H x 5.7" Dia | 25cm H x 14.5cm Dia

Weight 2.5lbs; 4.7lbs with cartridge | 1.1kg/2.1kg

Coverage Up to 30,000 cu. ft (850 m³)

Variable Intensity 5% - 95% in increments of 5%

Day Timer 7-day, 24-hour timer with 14 event settings

Power Consumption <15 watts

Power Requirements 12V DC, supplied with 100 - 240V AC power adapter and 10 ft cable (UL/PSE/CCC/CE listed)
