RETAIN YOUR OLD CUSTOMERS AND GAIN NEW ONES.

89% of people associate odor with a level of cleanliness. Consumer research has proven that people smell for signs of clean before they look for them. A clean, fresh scent helps you reassure the **89%** of people who consider odor when evaluating the cleanliness of their environment.

2020 has been a challenging year for our business as I am sure it has been for yours. Our team put their heads together with one question in mind – How can we help struggling businesses get back to business while giving your customers peace of mind by assuring them you are doing everything you can to keep your business clean. We developed our new **CLEAN & FRESH SCENT SERIES**.

For years GTI has been developing scents and scent delivery systems for our military around the world for training purposes and for universities involved in PTSD studies. We've also developed scents for some of your favorite amusement rides around central Florida.

We feel this is a great solution for you to pass on the clean smell that you get the first 10 minutes after cleaning, throughout the day.

- This cannot be a false sense of health security. Therefore, we require businesses to show us they are a GBAC STAR™ facility (or equivalent) or present us their cleaning procedures and how they are following the CDC guidelines.

All the scents we deliver are IFRA compliant. What that simply means, is that it is safe to breath and safe for the environment. We do not test on animals.
